

VONIA T2400 DIALPAD

Backlit Display Dialpad with CLI and Dual Headset Port

The cost-effective **T2400** Dialpad delivers superior comfort and heavy performance to growing customer contact centers. Featuring ergonomically designed, firm-key dial pad, the **T2400** reduces all-day wear and repeated dialing stress. Three flash settings provide flexibility, CLI for identification of caller and a supervisor port allows direct access to a supervisor with the customer on live call.

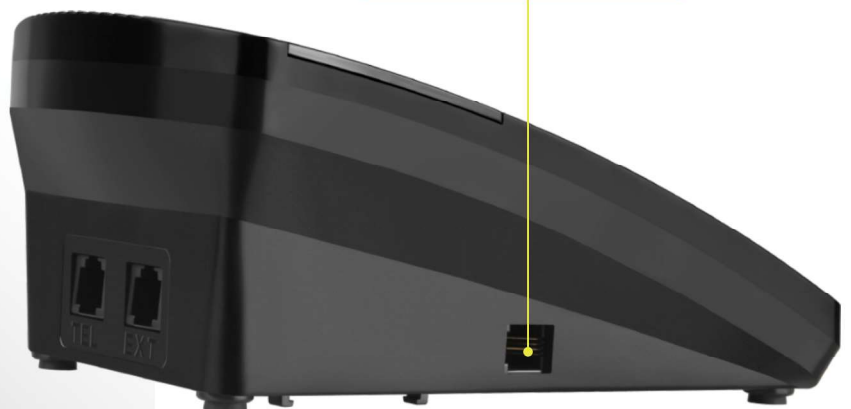

BENEFITS & FEATURES

- Flash button: used to create flash when using call waiting, or when used with a PBX system.
- Telephone line jack: connect incoming telephone line plug into telephone wall jack.
